

Maxillofacial surgery and oncology

1. IMPRINT	
Academic Year	2023/2024
Department	Faculty of Medicine and Dentistry
Field of study	English Dentistry Division
Main scientific discipline <i>(in accordance with appendix to the Regulation of Minister of Science and Higher Education from 26th of July 2019)</i>	Medical sciences
Study Profile <i>(general academic / practical)</i>	General academic
Level of studies <i>(1st level / 2nd level / uniform MSc)</i>	Uniform MSc
Form of studies	Full-time program
Type of module/ course <i>(obligatory / non-compulsory)</i>	Obligatory
Form of verification of learning outcomes <i>(exam/completion)</i>	Completion
Educational Unit / Educational Units <i>(and address / addresses of unit / units)</i>	Department of Cranio-Maxillofacial Surgery, Oral Surgery and Implantology, Medical University of Warsaw Lindley's 4 str. 02-005 Warszawa, building 4 (22) 502-17-97

Head of Educational Unit / Heads of Educational Units	Paweł Zawadzki PhD, DDS, Associate Professor
Course coordinator (title, First Name, Last Name, contact)	Paweł Zawadzki PhD, DDS, Associate Professor
Person responsible for syllabus (First name, Last Name and contact for the person to whom any objections concerning syllabus should be reported)	Andrzej Kołciuk, PhD, DDS andrzej.kolciuk@wum.edu.pl
Teachers	Błażej Bętkowski DDS, blazej.betkowski@wum.edu.pl Edyta Jaworska PhD, DDS edyta.jaworska@wum.edu.pl Michał Jonasz PhD, DDS michal.jonasz@wum.edu.pl Andrzej Kołciuk DDS andrzej.kolciuk@wum.edu.pl Bartłomiej Szczodry DDS bartlomiej.szczodry@wum.edu.pl

2. BASIC INFORMATION

Year and semester of studies	4 th year, 8 th semester	Number of ECTS credits	3.00
FORMS OF CLASSES		Number of hours	ECTS credits calculation
Contacting hours with academic teacher			
Lecture (L)	8	0,4	
Seminar (S)	26	1	
Discussions (D)	26	1	
e-learning (e-L)	0	0	
Practical classes (PC)			
Work placement (WP)			
Unassisted student's work			
Preparation for classes and completions	17	0,6	

3. COURSE OBJECTIVES

O1	Students train their examination skills on patients, the diagnosis of cancer, the consequences of craniofacial injuries, first aid, collecting material for histopathological examination, preventive medicine in precancerous and cancerous conditions, extractions, extraoral incision of odontogenic abscesses, performing allergic tests. Students participate in all procedures in the field of maxillofacial surgery. In the 3-week course:
O2	Students should familiarize with topics, scope and methods of treatment of patients in the clinic through active participation. Students work individually with assistants who supervise their treatment of patients.
O3	Students should get familiar with the course of work of an outpatient clinic, the general ward, the nature of medical work, documentation and movement of patients as well as with methods of taking care of patients and the organization of the Operating Room.
O4	Students should pay attention to the occurring disease entities, methods of their recognition, documentation, treatment and rehabilitation of patients after surgery.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)

<p>Code and number of effect of learning in accordance with standards of learning (in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</p>	<p>Effects in time</p>
---	-------------------------------

Knowledge – Graduate* knows and understands:

F.W1.	occlusal norms at different stages of development and deviations from the norms
F.W2.	principles of preventive and therapeutic management in diseases of the masticatory organ at different stages of development
F.W3.	viral, bacterial and fungal flora of the oral cavity and its importance
F.W4.	symptoms, course, and management in specific diseases of the oral cavity, head, and neck, considering different age groups
F.W8.	principles of management in cases of cysts, pre-cancerous conditions and head and neck cancers
F.W10.	indications and contraindications for treatment with dental implants
F.W12.	causes of complications in diseases of the stomatognathic system and principles of management in case of such complications
F.W13.	principles of antibiotic therapy and antibiotic resistance
F.W14.	methods of rehabilitation of the masticatory apparatus
F.W16.	principles of anaesthesia in dental procedures and basic pharmacological agents
F.W19.	pathomechanism of oral disease impact on general health
F.W22.	principles of management in cases of diseases of the masticatory organ, dental traumas, and jaw bone injuries

Skills– Graduate* is able to:	
F.U1.	conduct a medical interview with the patient or their family
F.U2.	conduct the physical examination of the patient
F.U3.	explain the symptoms to the patient, determine the method of treatment confirmed by the patient's informed consent and prognosis
F.U7.	determine indications to perform a certain dental procedure
F.U8.	conduct treatment of acute and chronic, dental and non-dental inflammatory processes of the oral cavity soft tissues, periodontium, and jaw bones
F.U9.	provide treatment in the event of general and local complications during and after dental procedures
F.U10.	prescribe medications taking into account their interactions and side effects
F.U11.	keep current patient records, make referrals for dental and general medical examinations or treatment

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019, „graduate“, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)	
Number of effect of learning	Effects of learning i time
Knowledge – Graduate knows and understands:	
K1	
Skills– Graduate is able to:	
S1	
S2	
Social Competencies – Graduate is ready for:	
SC1	
SC2	

6. CLASSES		
Form of class	Class contents	Effects of Learning
Lectures	Lecture 1 Fractures of the upper face massif- anatomy, etiology, epidemiology, types of fractures, diagnostics, treatment, complications	F.W4., F.W12., F.W16., F.W19., F.W22.

	<p>Fractures of the lower face massif- anatomy, etiology, epidemiology, types of fractures, diagnostics, treatment, complications</p> <p>Lecture 2</p> <p>Infections in the head and neck. Inflammation – general information – types of inflammation, etiology, principles and methods of treatment, complications. Acute odontogenic inflammation. Directions of propagation of the inflammatory process from the apical region in the mandible and maxilla – periodontitis, periosteitis, subperiosteal abscess, submucosal abscess, subcutaneous abscesses, space – clinical picture, differentiation. Chronic odontogenic inflammation. Osteoarthritis of the jaws: acute, chronic, diagnosis and treatment. Specific inflammations: actinomycosis, syphilis, tuberculosis (clinical manifestations in the oral cavity). Complications of inflammation of the oral cavity. Diseases of the maxillary sinuses.- anatomy and physiology of the maxillary sinuses, types of diseases, treatment, complications</p> <p>Lecture 3</p> <p>Oncological prophylaxis and its importance. Introduction to oncology, HPV- basic definitions, nomenclature, types of cancer, etiology, epidemiology, impact of HPV infection Malignant neoplasms of the oral cavity and facial part of the skull - types of cancer, etiology, epidemiology, diagnostics, treatment, prognosis. Neoplastic lesions of the oral cavity and facial part of the skull. Benign neoplasms – types of cancer, etiology, epidemiology, diagnostics, treatment, prognosis.</p> <p>Lecture 4</p> <p>Odontogenic tumors – types of cancer, etiology, epidemiology, diagnostics, treatment, prognosis. Cysts of the jaw, mouth and neck bones – types of cysts, etiology, epidemiology, diagnostics, treatment</p> <p>Lecture 5</p> <p>Fundamentals of head and neck embryology. Etiopathogenesis of craniofacial malformations, their division, types of malformations, epidemiology, diagnosis, treatment. Complex craniofacial malformations (Crouzon syndrom, Apert syndrom, Pierre- Robin syndrom, Mobius syndrom, Caffey-Silverman syndrom, Parry- Romberg syndrom)</p> <p>Lecture 6</p> <p>Diagnosis and treatment of temporomandibular joint disease- anatomy, aetiology, epidemiology, types of conditions, diagnosis, treatment, complications</p> <p>Lecture 7</p> <p>Salivary gland disorders- anatomy, physiology, types of disorders, aetiology, epidemiology, diagnosis, treatment, complications</p> <p>Lecture 8</p> <p>Bone reconstructions in the head and neck - types of post-resection defects, methods and materials used for reconstruction, indications, contraindications, complications, clinical cases</p>	<p>F.W3,F.W13</p> <p>F.W8</p> <p>F.W8</p> <p>F.W1., F.W2</p> <p>F.W4., F.W12.,F.W14. F.W16., F.W19., F.W22.</p> <p>F.W4., F.W12., F.W16., F.W19., F.W22.</p> <p>F.W4,F.W12,F.W16,F.W19, F.W22 .</p> <p>F.W10</p>
<p>Seminars</p>	<p>S1. Organisation of work in the department and outpatient clinic</p>	<p>F.W4,F.W12,F.W16, F.W19, F.W22</p>

S2. Qualification of patients for treatment in the maxillo-facial surgery department. Qualification of patients for surgery - clinical physical and subjective examination, laboratory diagnosis, co-morbidities, multispeciality consultations	F.W4,F.W12,F.W16, F.W19, F.W22
S3. Head and neck anatomy- review.	F.W4,F.W12,F.W16, F.W19, F.W22
S4. Craniofacial injuries, classification of craniofacial fractures - review	F.W4,F.W12,F.W16, F.W19, F.W22
S5. Indications and contraindications for surgery under general anaesthesia.- co-morbidities, diagnosis	F.W4,F.W12,F.W16, F.W19, F.W22
S6. Surgical management of patients with an internal medicine burdens - comorbidities, diagnosis	F.W4,F.W12,F.W16, F.W19, F.W22
S7. Management of the post-concussion patient - patient assessment. Emergency conditions. Transfusion of blood and blood substitutes.	F.W4,F.W12,F.W16, F.W19, F.W22
S8. Skin cancers- types of cancer, etiology, epidemiology, diagnostics, treatment, prognosis.	F.W8
S9. Craniofacial defects – types, diagnostics and treatment.	F.W1, F.W2
S10. 3D planning and preparation of patients for orthognathic surgery.	F.W10
S11. Treatment of mandibular fractures – etiology, epidemiology, symptoms, diagnosis, treatment, complications	F.W4,F.W12,F.W16, F.W19, F.W22
S 12. Preparation of the oral cavity for dentures, augmentation procedures, types of procedures, indications, contraindications, occlusal reconstruction (based on intraosseous implants)	F.W10
S 13. Potentially malignant disorders of the skin, mouth and lips - types, etiology, diagnostics, treatment	F.W10
S 14. Cranial nerve disorders - anatomy, types, etiology, diagnosis, treatment.	F.W4,F.W12,F.W16, F.W19, F.W22
S 15. Dental implantology – introduction, indications for treatment, qualification of the patient. Materials used for guided tissue regeneration. Augmentation procedures, indications and qualification of patients for treatments. Augmentation procedures, indications and qualification of patients for procedures, case studies.	F.W10
S 16. Surgical accesses- anatomy, principles of choosing a surgical approach, clinical cases	F.W4,F.W12,F.W16, F.W19, F.W22
Test. Discussion and summary of the classes	

Practical classes	C1- C8- conduct a medical interview	F.U1
	C9- C17- conducting a physical examination and talking to the patient about the proposed treatment, informed consent to surgical procedures, informing about the prognosis and possible complications resulting from the therapy	F.U2
	C18- C24- planning of the treatment process including diagnostics, surgical treatment, pharmacological treatment and post-operative care based on cases presented on the ward, possibility of passive or active participation in surgical procedures	F.U3., F.U7., F.U8. F.U9., F.U10
	C24- C26- Creating the history of the disease based on cases present in the ward	F.U11.
