

Biochemistry with elements of chemistry

1. IMPRINT	
Academic Year	2022/2023
Department	Faculty of Dental Medicine
Field of study	English Dentistry Division
Main scientific discipline <i>(in accord with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>	Medical sciences
Study Profile <i>(general academic / practical)</i>	General academic
Level of studies <i>(1st level / 2nd level / uniform MSc)</i>	Uniform MSc
Form of studies	Full-time studies
Type of module / course <i>(obligatory / non-compulsory)</i>	Obligatory
Form of verification of learning outcomes <i>(exam / completion)</i>	Exam after IV semester
Educational Unit / Educational Units <i>(and address / addresses of unit / units)</i>	Chair and Department of Biochemistry, Faculty of Medicine 02-097 Warsaw, ul. Banacha 1 Phone: +48 (22) 57 20 693 e-mail: biochemia@wum.edu.pl https://biochemia.wum.edu.pl

Head of Educational Unit / Heads of Educational Units	Professor Marta Struga, MD, PhD
Course coordinator (title, First Name, Last Name, contact)	Professor Marta Struga, MD, PhD; marta.struga@wum.edu.pl Phone: +48 (22) 57 20 693
Person responsible for syllabus (First name, Last Name and contact for the person to whom any objections concerning syllabus should be reported)	Ewa Usarek, PhD; ewa.usarek@wum.edu.pl
Teachers	Alicja Chrzanowska PhD; alicja.chrzanowska@wum.edu.pl; Wojciech Graboń PhD; wojciech.grabon@wum.edu.pl Dagmara Kurpios-Piec PhD; dagmara.kurpios-piec@wum.edu.pl; Magdalena Mielczarek-Putka PhD; magdalena.mielczarek-puta@wum.edu.pl; Dagmara Otto-Ślusarczyk PhD; dagmara.otto@wum.edu.pl; Michał Skrzycki PhD; michal.skrzycki@wum.edu.pl; Jolanta Szymańska-Majchrzak PhD; jolanta.szymanska@wum.edu.pl; Ewa Usarek PhD; ewa.usarek@wum.edu.pl Barbara Żyżyńska-Granica PhD; barbara.zyzynska@wum.edu.pl

2. BASIC INFORMATION

Year and semester of studies	II year, III and IV semester	Number of ECTS credits	8
FORMS OF CLASSES		Number of hours	ECTS credits calculation
Contacting hours with academic teacher			
Lecture (L)		35	1.4
Seminar (S)		35	1.4
Discussions (D)			
e-learning (e-L)			
Practical classes (PC)		50	2.0
Work placement (WP)			
Unassisted student's work			
Preparation for classes and completions		95	3.2

3. COURSE OBJECTIVES

O1	To develop a solid understanding of the structures, properties and metabolism of substances present in the body: proteins, carbohydrates, lipids, nucleic acids, vitamins, hormones; control and integration of metabolic pathways.
----	---

O2	To give the insight into understanding how metabolic processes can contribute to explanation of pathological phenomena.
O3	To give the students experience in biochemical methodology in order to appreciate the clinical biochemistry techniques as diagnostic tools, and to be able to interpret the results for appropriate diagnosis and follow up of patients.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)

Code and number of effect of learning in accordance with standards of learning <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>	Effects in time
--	------------------------

Knowledge – Graduate* knows and understands:

B.W1.	the importance of major and trace elements in body processes, including supply, absorption and transport;
B.W2.	the importance of electrolytes, buffer systems and chemical reactions in biological systems;
B.W3.	biochemical basis of the integrity of the human body;
B.W4.	structure and functions of important chemical compounds present in the human body, in particular properties, functions, metabolism and energetics of the reaction of proteins, nucleic acids, carbohydrates, lipids, enzymes and hormones;
B.W5.	principles of calcium and phosphate economy;
B.W6	the role and importance of body fluids, including saliva;
B.W21.	the principles of acid-base balance and the transport of oxygen and carbon dioxide in the body;
B.W22.	principles of metabolism and nutrition;

Skills– Graduate* is able to:

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)

Number of effect of learning	Effects of learning in time
-------------------------------------	------------------------------------

Knowledge – Graduate knows and understands:

K1	Basic biochemical laboratory techniques.
----	--

Skills– Graduate is able to:

S1	Calculate: the pH and concentration of the solution (percentage, molar), the osmolarity of the body fluids.
S2	Use the basic measurement equipment and assess the precision of the measurements.
S3	Plan and perform simple experiments, interpret results and draw conclusions

Social Competencies – Graduate is ready for:

SC1	-
-----	---

6. CLASSES		
Form of class	Class contents	Effects of Learning
Lecture	L1 – Lecture 1 - Basics of chemistry Properties of water. Acid-base balance, pH. Buffers. Basics of organic chemistry (structure of hydrocarbons, aromatic compounds, alcohols, ethers, aldehydes, ketones, carboxylic acids, esters, amines, amides). Redox reactions.	B.W1. B.W2.
	L2 – Lecture 2 - Proteins structures Amino acids and proteins structures, classification and functions. Examples of peptides and proteins. Denaturation and coagulation of proteins.	B.W1., B.W3., B.W4.
	L3 – Lecture 3 - Enzymes Classification of enzymes. Mechanism of enzymatic reaction. Enzyme structure. Regulation of enzymatic activity. Inhibition. Specificity.	B.W2., B.W4.
	L4 – Lecture 4 - Structure of nucleic acids, DNA replication Structure and components of nucleoside and nucleotide. DNA and RNA – comparison. Genome organization. Mechanism of DNA replication in procaryotic and eucaryotic cells.	B.W2., B.W4.
	L5 – Lecture 5 - Transcription, translation Gene expression – the central dogma of molecular biology. Transcription and translation – mechanism, enzymes, substrates, inhibitors.	B.W2., B.W4.
	L6 – Lecture 6 - Tissue oxidation ATP as a high energy compound. The role of NAD an=d FAD in catabolism and anabolism. Cellular respiration: stages and reactions. Synthesis of ATP: substrate level phosphorylation and oxidative phosphorylation. The role and structure of mitochondrial electron transport chain.	B.W4., B.W8.
	L7 - Lecture 7 - Carbohydrates metabolism – part 1. Carbohydrates – classification and functions. Digestion of carbohydrates. Glycolysis. Fates of pyruvate. Gluconeogenesis. Pentose phosphate pathway.	B.W4., B.W8.
	L8 - Lecture 8 - Carbohydrates metabolism – part 2. Biosynthesis of "active glucose" (UDPG). Glycogen structure, storage and metabolism (glycogenesis, glycogenolysis). Glycogen storage defects. Galactose and fructose metabolism and metabolic disorders. Diabetes mellitus	B.W4., B.W8.
	L9 – Lecture 9 - Lipids metabolism – part 1. Lipids: classification, structures and functions. Digestion of lipids and absorption from the gastrointestinal tract (chylomicrons). Biosynthesis of triacylglycerols in the liver and in the adipose tissue. Hormonal regulation of lipolysis in adipose tissue. Oxidation of fatty acids - generation of ATP. Ketogenesis. Fatty acids biosynthesis. The central role of acetyl-CoA in metabolism.	B.W4., B.W8.

	<p>L10 – Lecture 10 - Lipids metabolism – part 2. Phospholipids, sphingolipids, prostaglandins – structure and biosynthesis. Steroid metabolism (synthesis and degradation of cholesterol). Steroid hormones. Synthesis and function of vitamin D. Blood lipoproteins.</p>	B.W4., B.W8.
	<p>L11 – Lecture 11 - Protein turnover, digestion. Ureogenesis. Amino acids metabolism Nitrogen balance. Metabolism of amino acids. Nitrogen metabolism – ureogenesis. Amino acids as a substrates for synthesis of physiologically active products.</p>	B.W4., B.W8.
	<p>L12 – Lecture 12 – Blood Red blood cell metabolism. Participation of hemoglobin in the transport of oxygen and carbon dioxide. Heme synthesis and degradation in physiological and pathological states. Acid-base balance regulation.</p>	B.W2., B.W6., B.W21.
	<p>L13 – Lecture 13 - Mineral metabolism: calcium, phosphate, fluoride. Hormones Metabolic importance of macrominerals and trace minerals. Types of hormones and their mechanism of action.</p>	B.W1., B.W4., B.W5., B.W22.
	<p>L14 - Lecture 14 - Vitamins Metabolic role of water-soluble and lipid-soluble vitamins. Symptoms of deficiency.</p>	B.W4., B.W22.
	<p>L15 – Lecture 15 - Biochemistry of the oral cavity. Saliva. Types of saliva and salivary glands. Saliva formation steps. General features of saliva. Stimulation of saliva secretion. Components (inorganic, organic) and pH of saliva. Functions of saliva (protection, digestion, speaking). The role of enzymes and proteins. Saliva in preventing of dental cavities. Salivary glands. Hyper- and hyposalivation states. Saliva as a fluid of diagnostic importance (examples of oral tests).</p>	B.W1., B.W3., B.W5.
	<p>L16 – Lecture 16 – Summary of the metabolism</p>	B.W3., B.W22.
Seminar	<p>S1 – Seminar 1 -Basics of chemistry, calculations Conversion of basic units (mass, volume). Different methods of concentration's expression (calculations of percent concentration and molarity, concentration conversion). Definition of pH, calculations.</p>	B.W2., S1
	<p>S2 – Seminar 2 – Proteins Amino acids structure, classification and properties. Proteins classification and functions. Structure of proteins (primary, secondary, tertiary, quaternary). Structure of myoglobin and hemoglobin. Physiological and pathological types of hemoglobin. Collagen – structure and synthesis. Denaturation and coagulation of proteins.</p>	B.W1., B.W3., B.W4.
	<p>S3 – Seminar 3 - Enzymes General characteristic of enzymes. Exergonic and endergonic reactions. Coenzymes and prosthetic groups. Classification. Mechanism of enzyme action (energy changes, enzyme specificity, active site, enzyme-substrate interactions). Factors affecting reaction velocity (enzyme and substrate concentrations, enzyme affinity for substrate, temperature, pH, modulators). Types of inhibition. Regulation of enzyme activity. Isoenzymes.</p>	B.W2., B.W4.
	<p>S4 - Seminar 4 - Structure of nucleic acids, replication, transcription, translation Nucleotides and nucleosides structure. DNA and RNA primary and secondary structures. Cellular organization of DNA - chromatin structure. DNA replication (mechanism, enzymes, role of telomeres, inhibitors). Transcription (mechanism, enzymes, inhibitors). Protein synthesis (genetic code, ribosomes, posttranslational modification of proteins, inhibitors)</p>	B.W4.
	<p>S5 – Seminar 5 - Tissue oxidation: TCA cycle, electron transport chain, oxidative phosphorylation</p>	B.W4., B.W22.

	<p>Localization of the electron transport chain, oxidative phosphorylation and Krebs cycle. Organization of the electron transport chain (protein complexes). Inhibitors of electron transport. 4. Mechanisms of oxidative phosphorylation - chemiosmotic hypothesis. Oxidative decarboxylation of pyruvate. Krebs cycle (reactions, role, regulation).</p>	
	<p>S6 – Seminar 6 - Carbohydrates metabolism Chemical structure of carbohydrates. Glucose metabolism (glycolysis, gluconeogenesis, pentose phosphate pathway). Central role of glucose-6-phosphate in carbohydrates metabolism. Biosynthesis and use of "active glucose" (UDPG). Glycogen synthesis (glycogenesis) and degradation (glycogenolysis). Metabolic importance of glucuronic acid. Galactose and fructose metabolism.</p>	B.W4., B.W22.
	<p>S7 – Seminar 7 - Lipids metabolism Lipids classification and structure (fatty acids, triacylglycerols, glycerophospholipids, sphingolipids). Lipids digestion and absorption from the gastrointestinal tract. Biosynthesis of triacylglycerols in the liver and adipose tissue. Hormonal regulation of lipolysis in adipose tissue (effect of insulin and epinephrine). Degradation of fatty acids (β-oxidation, ATP generation). Ketogenesis. Fatty acids biosynthesis. Steroids metabolism (cholesterol, bile acids, steroid hormones, vitamin D3. Blood lipoproteins (chylomicrons, VLDL, LDL, HDL). Central role of acetyl-CoA in lipids metabolism.</p>	B.W4., B.W22.
	<p>S8 – Seminar 8 - Ureogenesis, amino acids metabolism Biologically active non-protein nitrogen compounds. Nitrogen balance. Essential and non-essential amino acids. Glucogenic and ketogenic amino acids. Amino acid decarboxylation. Amino acid nitrogen metabolism (transamination, oxidative deamination, ureogenesis. Metabolism of individual amino acids – synthesis of physiologically active products (Arg, Gly, Ser, Met, Cys, Phe, Tyr, Trp). Defects in amino acid metabolism (phenylketonuria, albinism).</p>	B.W4., B.W22.
	<p>S9 – Seminar 9 – Blood Functions of blood. Plasma chemical components (proteins, glucose, lipids, ions). Diagnostic enzymes. Hemoglobin (types of hemoglobin, transport of oxygen and carbon dioxide - mechanism and regulation). Heme (structure and degradation, bilirubin circulation, jaundice). Transport of CO₂ in blood. Maintenance of acid-base balance. Acidosis and alkalosis</p>	B.W2., B.W6., B.W21.
	<p>S10 – Seminar 10 - Metabolism of vitamins and minerals Vitamins: definition, classification. Water-soluble vitamins: structure, physiological function, symptoms of deficiency (thiamine, riboflavin, niacin, pantothenic acid, pyridoxine, biotin, folic acid, cobalamin, vitamin C). Lipid-soluble vitamins: structure, physiological function, symptoms of deficiency (vitamin A, vitamin D3, vitamin K, vitamin E). Hormone-like function of vitamin A and vitamin D3. 4. Physiological function of minerals (Ca, P, Na, Cl, K, S, Fe, Cu, Mg, I, F, Zn, Mn, Cr, Mo, Co, Se).</p>	B.W1., B.W3., B.W4., B.W5., B.W22.
	<p>S11 – Seminar 11 - Hormones Mechanism of action and metabolic effects of peptide hormones (insulin, glucagon, PTH), amino acid derived hormones (T4, T3, epinephrine), steroid hormones (glucocorticoids, mineralocorticoids, androgens, estrogens).</p>	B.W3., B.W4., B.W22.
Practical class	<p>PC1. Biochemical calculations Calculation problems – practical tasks (percent concentration, molarity). Calculation of pH. Calculation of enzymatic activity (international unit, specific activity, concentrations of activity).</p>	B.W2., S1.
	<p>PC2. Proteins Amino acids structures. Structure and conformation of proteins. . Detection of proteins. Determination of protein concentration. Methods of protein separation and identification. Denaturation and precipitation (coagulation) of proteins. Blood</p>	B.W4., K1, S2, S3.

plasma proteins: concentration, structure, properties, methods of separation, physiological function. Isoelectric point determination.	
PC3. Enzymes Enzyme structure (characteristic of apoenzyme, coenzyme and prosthetic group). Mechanism of enzyme catalysis (enzyme specificity, active site). Classification of enzymes. Enzymatic specificity. Methods of enzyme activity determination and calculation (units of enzyme activity). Isoenzymes.	B.W4., K1, S2, S3.
PC4. Carbohydrates Carbohydrates: biological role in human. Starch: structure and digestion. Glucose: metabolism and regulation of blood level. Glycogen: structure and metabolism. Glycogen storage diseases. Glucose-6-phosphatase and alpha-1,4-glucosidase activity determination.	B.W4., B.W22., K1, S2, S3.
PC5. Lipids Lipids - structure, function, classification, digestion, solubility in different types of solvents. Plasma lipids transport – structure, function, and metabolism of lipoproteins. Cholesterol – function, synthesis, degradation. Determination of cholesterol and lipids concentration in blood plasma. The role of bile and bile acids. Gallstones: types, analysis. Steroid hormones - classification. Diagnostic value of 17-ketosteroids determination.	B.W4., B.W22., K1, S2, S3.
PC6. Digestive enzymes. Saliva Components and role of saliva, gastric and pancreatic juices. Proteolytic cleavage as a mechanism of digestive enzymes activation. The enzymatic digestion of carbohydrates, proteins and lipids. The components and function of bile in lipids digestion. The role of hydrochloric acid. Determination of the acidity of gastric juice. Determination of enzymatic activity of digestive enzymes (salivary amylase, pepsin, pancreatic lipase)	B.W6., B.W22., K1., S2, S3.
PC7. Blood Function of blood. The role and detection of blood components and proteins. Hemoglobin (structure, function, methods of determination). Bilirubin detection and role in physiological and pathological states (jaundices). Hemolysis.	B.W6., B.W21., K1, S2, S3.
PC8. Urine constituents Renal threshold. Clearance: definition, methods of determination. Physiological (normal) and pathological (abnormal) constituents of the urine – diagnostic importance. Detection of protein, glucose, ketone bodies, bilirubin, urobilinogen, and blood is a sample of urine.	B.W6., K1, S2, S3.
PC9. Biochemistry all around us Antioxidants detection and determination of antioxidant potential. Determination of vitamin C concentration. Reducing properties of vitamin C – iodine clock reaction.	B.W22., K1, S2, S3.
PC10. Revision	B.W22., K1., S2, S3.

7. LITERATURE

Obligatory

- Biochemistry Lippincott's Illustrated Reviews, D.R. Ferrier (R.A. Harvey ed.), Wolters Kluwer, Lippincott, Williams & Wilkins, sixth edition.
- Harpers' biochemistry, R.K. Murray, D.K. Granner, P.A. Mayers, V.W. Rodwell, Appleton & Lange. Last edition.

Supplementary

- General Chemistry with Qualitative Analysis – Whitten, Davis, Peck, VI ed., Saunders College Publishing, 2000.
- Introduction to Organic Chemistry – Brown, W.H. Saunders College Publishing, 2000.
- Biochemistry. L. Stryer, W.H. Freeman & Company, New York.

4. Principles of Medical Biochemistry, G. Meisenberg, W.H. Simmons, Elsevier (online access + interactive extras, studentconsult.com).
5. Medical Biochemistry, J.W. Baynes, M.H. Dominiczak, Elsevier, (online access + interactive extras, studentconsult.com). Last edition.
6. Textbook of Biochemistry with clinical correlations, T.M. Devlin, Willey-Liss, Inc. Last edition.

8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
e.g. G.K1., G.S1., K1.	<i>This field defines the methods used for grading students e.g. pop quiz, test, written report etc.</i>	e.g. threshold number of points
B.W1., B.W2., B.W3., B.W4., B.W5., B.W6., B.W21., B.W22., S1.	Continuous assessment during seminars – weekly tests	At least 60% of points Active discussion during seminars
	Intermediate assessment tests (2 tests, 50 questions each, test questions with one correct answer) Final exam (test, 75 questions, test questions with one correct answer)	At least 55% of points
B.W1., B.W2., B.W3., B.W4., B.W5., B.W6., B.W21., B.W22.,K1, S1, S2, S3.	Continuous assessment during laboratory classes – weekly tests	At least 60% of points
	Written laboratory reports	Credit by the teacher

9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

The Student is obligated to:

- attend all lectures, laboratory classes, seminars, and intermediate assessments (being late for over 15 minutes is treated as an absence)
- be prepared and participate in discussions during seminars and laboratory classes
- use university e-mail addresses s0xxxx@student.wum.edu.pl

It is not allowed:

- to copy lab reports, assignments, test or exam answers
- to allow that someone else could copy another Student's report/assignments/test/exam
- to use electronic devices to communicate or store data during the test or exam
- to impersonate or to use the login or password of another Student

Absence due to illness is excused only by a medical note/doctor's certificate. The student should notify the course coordinator within three business days. Unexcused absences may result in failing the entire course of biochemistry. Unexcused absence from the intermediate assessment/s or exam means failing.

Students can get the credit for the whole course and take the final exam if she/he credits laboratory classes, seminars, and assessment tests.

The final exam and the intermediate assessment tests grading:

- 0 - 54 % - 2.0
- 55 - 63 % - 3.0
- 64 - 73 % - 3.5
- 74 - 83 % - 4.0
- 84 - 92 % - 4.5
- 93 - 100 % - 5.0

The final grade may be increased by additional points in the case of good results of the intermediate tests:

- the average grade 4.75-5.00: 5 points
- the average grade 4.50-4.74: 3 points
- the average grade 4.25-4.49: 2 points

Students may join the Science Club "Explore"; person responsible: Barbara Żyżyńska-Granica, e-mail: barbara.zyzynska@wum.edu.pl

The property rights, including copyrights, to the syllabus are vested in Medical University of Warsaw. The syllabus can be used for purposes related to education during studies at the Medical University of Warsaw. The use of the syllabus for other purposes requires the consent of the Medical University of Warsaw.
